

## **CANNABIS SECURITY SERVICES**

The security services set forth herein will adhere to and be in compliance with all Pennsylvania Statutes and Rules and Regulations specifically:

Title 28 HEALTH AND SAFETY  
PART IX. MEDICAL MARIJUANA  
CHAPTER 1141. GENERAL PROVISIONS  
CHAPTER 1151  
CHAPTER 1161

### **A. PRE-APPROVAL FOR CANNABIS APPLICANT(S)**

INA will conduct a comprehensive background check on all individuals and/or entities filing a grower or dispensary application. In the Commonwealth's application review process, a flawed investor may result in the entire application being rejected. Initial due diligence on an application prior to submission allows for mitigating potential issues.

### **B. COMPERHENSIVE SECURITY PLAN**

INA proposes to draft a comprehensive security policy and plan with relevant protocols that are in compliance with the Commonwealth's requirements. This plan will be attached to your cannabis application and include building security plans for the design, installation, repair and 24 hours monitoring of the closed circuit TV system, perimeter and interior intrusion detection system, electronic access control system and fire detection system.

### **C. PRODUCT SECURITY TRANSPORATION PLAN**

The product security transportation plan will be implemented by a 100 percent Woman Business Enterprise (WBE) trucking company. This plan will include protocols for initial importation of cannabis into Pennsylvania and subsequent shipments from growers, inter-exchange of payment between dispensaries, and for product destruction.

### **D. ARMED AND UNARMED SECURITY OFFICERS**

INA can provide a uniformed, casual or professionally attired armed or unarmed 24 hour security presence at grower or dispensary locations. Each officer is 235 Certified and receives 40 hours of professional training that includes: use of force, managing of aggressive behavior, first aid/CPR/AED, baton certification, pepper spray, handcuff training, firearms training, and handling of emotionally-disturbed individuals training. Post Orders are specifically designed for each site.

### **E. PRE-EMPLOYMENT SCREENING**

INA will perform a comprehensive or a la carte background search on employee applicants to identify their moral and financial character. The background research includes criminal history, financial trustworthiness, propensity to file legal actions, workers compensation history, state and federal liens, education and employment history, professional licenses held, conflict of interest review and in-depth social media research.

**F. CONSULTING SERVICES**

Consulting services are contracted on a continuing or ad hoc basis. Services include: investigation of theft or mismanagement; forensic accounting, digital forensics, money laundering, conflict of interest, product tampering, product shortages, IT security issues and on site and/or virtual risk assessment surveys.

**G. BUSINESS INTELLIGENCE**

Cannabis industry and site specific reports are distributed daily and weekly. Our analysts are trained to monitor all media to identify client threats and provide risk mitigation recommendations. We monitor activist individuals and groups; derogatory, inflammatory and direct action extremists; for brand protection and for personal protection of executives. INA reports are tailored for each client.
